

Maher Limited is a steel stockholder and processor specialising in high-strength, high-performance alloys. Some of the alloys we stock contain tin (Phosphor Bronze) or tungsten (Stellite, L605). None of the materials, to the best of our knowledge, were sourced from the DRC or any of the countries listed in the Dodd-Frank Wall Street Reform and Consumer Protection Act 2010. Maher Ltd will only source responsibly and will not purchase material that has originated or is suspected to have originated in the DRC or surrounding territories. We hold statements of compliance from our suppliers which are held on file and subject to periodic review. To date, none of our suppliers have indicated that any of their raw materials have been sourced from locations linked to conflict minerals.

In cases where the manufacture of our stock predates the introduction of the Dodd-Frank Act we cannot give assurances to the material origins.

For Maher Limited
